Welcome to our Fifth Annual SAFE Bred Heifer Sale. We are proud of the heifers that Deer Creek is offering.

Our heifers were born in November and December, 2017, except for #8016 and 8156, which were heifer's calves and born in September. At first working in February they received Bovishield Gold and Ultrabac7. The main herd was weaned Sept. 1, vaccinated with Bovishield Gold FP VL5, Ultrabac7/Somubac and Presponse, and wormed with Cydectin. Boosters were given 3 weeks later. They were backgrounded on ryegrass/clover with 1% body wt. soyhull pellets/day and good baleage. No implants of any kind have been used.

They were heat synchronized on a 30 day protocol and AI'd by Shannon Sledge on Nov. 28. Pregnancy test was done on March 20 by Shannon, by sonogram. They were re-wormed on April 5 with Longrange AND Synantic. The pasture backup bull, M&J Final Cross G4, has a BW EPD of -1.4 and CED of 13. We have had great results using him on heifers.(see back of page)

We guarantee these heifers to be safe in calf on the day of sale. If any one shows signs of heat or a negative pregnancy test within 65 days of sale we will pick her up and refund sale price. Due to differing levels of management, environmental factors, and the inherent risks of calving heifers we cannot guarantee safe birth of a live calf.

Thanks for your support!
